

Laconia Fire Station

Laconia, NH

Owner:	City of Laconia	Contractor:	North Branch Construction, Inc.
Architect:	Warrenstreet Architects, Inc.	Structural Engineer:	SW & C Engineering Inc.
Type:	CFS Roof Trusses	Completion Date:	2015

Atlantic Prefab, Inc. provided the CFS roof trusses for a 13,000 SF addition to this existing and active fire station. At bid time, API provided an unsolicited VE option to change the specified truss spacing from 24" to 48" which ultimately won the job. Challenges on this project were matching the existing roof profiles as well as the timing of deliveries of trusses up to 48'-8" long on a tight and active job site.

Constructing Solutions.... Delivering Success.
