

**Fairfield Inns**  
 New England

Owner:	Roedel Companies	Contractor:	ROK Builders
Architect:	BMA Architects	Structural Engineer:	Summit Engineering
Type:	Specialty Roof Trusses	Completion Date:	2016

Description: Atlantic Prefab designed, fabricated and installed prefabricated CFS Specialty Roof Trusses for six Fairfield Inn locations across New England. As part of a façade renovation, API fabricated modular weather tight roof assemblies consisting of complex curved trusses. Our modular approach was the only way to meet the one day allotted for install and stay below the budget.

Constructing Solutions....Delivering Success.
